To: Engineering Hiring Team - COMPANY NAME

Position: POSITION TITLE

Date: September 19, 2026

Dear Hiring Team,

I am writing to express my strong enthusiasm for the POSITION TITLE role at COMPANY NAME. Having spent the past three years building production agentic systems, Model Context Protocol (MCP) integrations, and enterprise LLM workflows across European tech companies, I have developed a hands-on approach to turning complex customer requirements into reliable, maintainable software.

In my recent work at FlowSpace as a Forward Deployed & AI Engineer, I operated at the intersection of product architecture and customer delivery. I spearheaded the architecture of multi-step agent workflows utilizing ReAct and Plan-and-Execute paradigms, building custom Python and TypeScript middleware to bridge client APIs, databases, and LLMs. I established automated evaluation harnesses to rigorously quantify reasoning trajectory fidelity and latency, eliminating regressions before production rollout. Furthermore, I led the live data migration off a legacy stack to Next.js and Laravel, scaling the platform from 2,000 to over 4,500 active users.

At UltraStrategy, I built an end-to-end CV-parsing and candidate scoring pipeline using the Claude API, Affinda, and n8n, extracting structured entities from unstructured documents in production. Across client engagements at Ulink and Get2Germany, I managed technical delivery directly with stakeholders, shipping custom automations and API integrations under tight deadlines.

As a permanent resident holding an Italian EU Long-Term Residence Permit (*Permesso di Soggiorno UE per Soggiornanti di Lungo Periodo*), I have full legal authorization to work across the EU without requiring visa sponsorship. I am based in Venice (CET timezone) and available to start immediately.

I would welcome the opportunity to discuss how my practical agent engineering background and client delivery track record can contribute to COMPANY NAME's engineering goals.

Thank you for your time and consideration.

Sincerely,

Prabhavit Gupta
